

Lake Ozark Fire Protection District

1767 Bagnell Dam Blvd. Lake Ozark, Missouri 65049

Phn# 573-365-3380

Fax# 573-365-3758

The Lake Ozark Fire Protection District is located in central Missouri. The District is comprised of suburban/rural area and has a resident full-time population around 7,000. During the summer months in season, the population of the District can swell to over 60,000 people with the influx of tourists and part time residents.

The Fire District is a full-service Advanced Life Support Fire/Rescue agency operating out of 3 stations and a training center. The District maintains a dynamic fleet of apparatus that includes ambulances, engines, ladders, tankers, heavy rescue, and fire/rescue boats. Our firefighters are represented by the International Association of Fire Fighters Local 3987.

The District's primary response area is 42 square miles with 17 miles of lakefront waterway and 5 miles of the Osage river. In 2021, the Fire District responded to over 1500 emergency response incidents. Our responses include EMS, Fire, Water Rescue, Technical Rescue and Haz Mat incidents. We face numerous response challenges that are unique to our jurisdiction and topography. Our waterfront properties are well developed with many structures, both residential and commercial. Many of our commercial properties and resorts present unique response challenges in a unique environment.

We have automatic and mutual aid agreements with twelve (12) neighboring fire districts and four (4) EMS services. This increases our mutual aid response area to 1,247 miles and a population of 80,000. Similar to our District, the surrounding District's total population can grow from 80,000 to over 200,000 in the summer.

We are currently seeking applications for Firefighter/EMT-P and Firefighter/ EMT
