## MESSAGE FROM THE FIRE CHIEF

---

I am both honored and joyed with the opportunity to present the year end summary for the Lake Ozark Fire Protection District for 2023. This past year has brought many changes, challenges, and opportunities for our organization, and I could not be prouder of the entire team. The men and women of our organization have endured and persevered through an immense amount of change, while still delivering the highest level of customer service expected by our residents and visitors.

The first two quarters of 2023 brought an entire command staff change which required both an acclamation process for the new chiefs as well as the operational staff. All of which I feel all members have not only risen to the challenge but have continued to go above and beyond to exceed expectations.

Our district has encountered economic shortfalls requiring outside the box thinking to provide for both course correction while still maintaining the overall mission of serving our visitors and citizens. A firm and optimistic strategic plan moving forward will prevent repeat circumstances from materializing in the future.

The district continues to encounter a growth in new construction and full-time residence, which is great news, but will also be an increase in demand for services. Our code enforcement and inspections division continue to be very busy due to the before mentioned blessing, and we expect to see a continued rise in that activity for 2024.

The restrictions imposed by the COVID-19 pandemic have finally eased, and we will be able to resume normal safety inspection activities by our duty crews for commercial businesses to ensure the safety for our entire district.

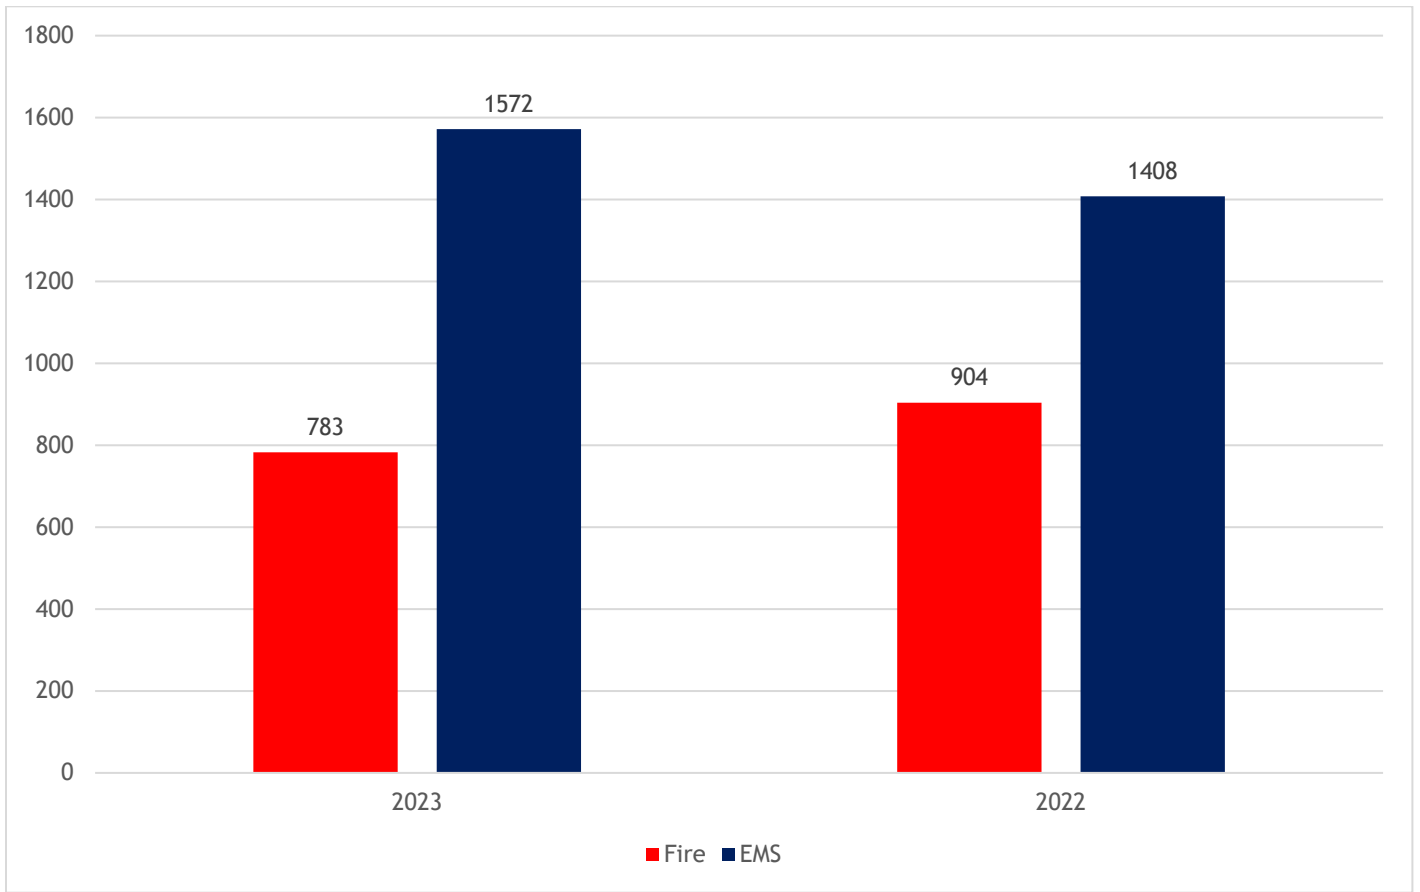

The future for Lake Ozark Fire Protection District is very bright and filled with opportunities to not only continue our highest level of service but expand our service capabilities to all of our customers.

Marc G. Carr, Fire Chief
